POWERFUL REPORTING

Transform any reporting, education, or safety procedures into easy and meaningful electronic processes. Browse our library of templates, customize your own reports, or mix and match!

ON-DEMAND DATA ANALYSIS

Reported information does not become actual knowledge without state-of-the-art analysis. With powerful real-time analytics and graphing features, turn your data into education and interventions that measurably impact patient safety.

ROBUST WORKFLOW MANAGEMENT

Track follow-up in real time and never lose data to "the shuffle." Set advanced notification criteria per user, or assign reviewers as needed. Once a report is submitted, the workflow engine takes over, ensuring all necessary reviews are timely and traceable.

SYSTEM-WIDE ACCESS

The Healthcare SafetyZone® Portal works wherever you work. Access the system anywhere in your organization including on your mobile device.

EVERGREEN TECHNOLOGY

We engage our clients for product feedback, which drives enhancements that are implemented seamlessly on a routine basis as part of your relationship with us. We don't do "versions."

LEADING CUSTOMER SERVICE

When you partner with us, you're partnering with four decades of healthcare risk management expertise. We're here for you from contract signing, to implementation and training, to ongoing support. With Clarity, you get the most out of your products and services.

PERFECT FOR EVERY PROVIDER TYPE

Our system was built from the ground up to be an intuitive data collection solution for the entire healthcare industry. That means you'll find levels of flexibility, relevant templates, and tailored pricing structures to fit any organization, from the largest academic medical centers and physician groups, to Critical Access Hospitals, Federally Qualified Health Centers, ambulatory facilities, and hospice.

"Clarity believes in quality and leadership in risk management. Their expertise goes to the core of the industry. We went with Clarity ultimately because they are a healthcare company and not just a software company."

- Judy Davis, Director/Corporate Risk Manager, Tallahassee Memorial HealthCare
