

The Healthcare SafetyZone® Portal is a web-based data collection system that is used to manage events ranging from traditional hospital incidents to patient complaints, security events to employee health events, and much more. It is designed to support the integrated management of risk, quality, safety, and service and to instill a culture of safety across the healthcare system.

## Key Features of the Portal

### Data Collection

- Encourages data entry and use with a simple interface
- Collects a variety of event types
- Upstream and downstream integration with other systems

### Implementation

- On-site IT support is minimal
- Technical requirements are minimal: Internet access and Internet Explorer 7.0 or higher
- Training is easy and takes less than 30 minutes

### Knowledge Management

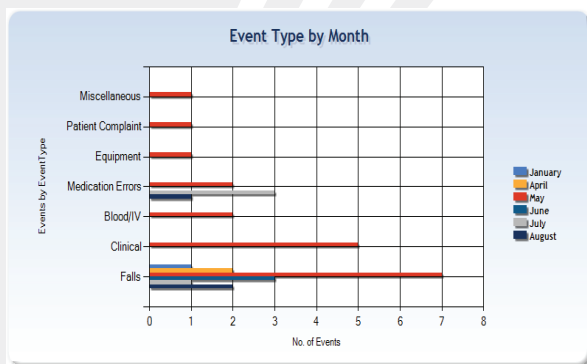

- Searchable library of information linked to specific types of events or situations
- Just-in-time learning from the moment a report is submitted

### Follow-Up

- Accelerated action through real-time communication
- Immediate email notifications and reminders

### Report Generation & Analysis

- Create template, ad hoc and customized reports
- Easily exports to Microsoft Excel™ and other data management tools
- Comprehensive and flexible analysis and graphing tools

**With the Portal, you have the ability to customize the system to meet your organization's specific needs!**
