empowers your staff
and moves your
organization to the
next level of quality
excellence. Our
intuitive business
intelligence system
combines data
collection, analysis
and internal
collaboration to
pinpoint your
healthcare
organization's
safety performance.

...FOR A NEW ERA OF HEALTHCARE ACCOUNTABILITY

Streamlined Data Collection	User-Defined Data Templates
Workflow Management	Rules-Based Immediate or Batch Notification
Comprehensive Analysis	Custom Template & Ad Hoc Graphing/Report Generation
Works the Way You Work	Molds to your Current Processes
Your Look & Feel	Personalized to Your Organization
Compatibility	Integrates with Upstream and Downstream Systems
System-Wide Access	Works through your Intranet
Web-Based ASP Model	Hosted Externally for Secure Connection and Support
Security	HIPAA Compliant and Password Protected

Benefits

- Time saved by staff in the reporting process
- Increased reporting from across the system of care
- Improved accuracy and timeliness of data
- Accelerated action through real-time communication
- Linked reporting to just-in-time education
- Supported culture of collaboration and sustained positive change

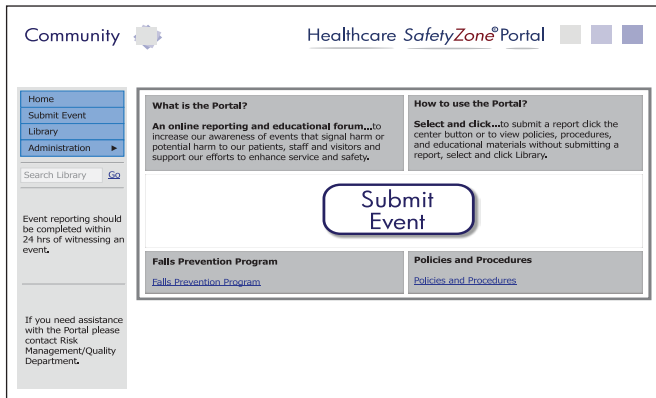

Demonstrated Results

- Increased front-end awareness
- Enhanced information, audit trails and follow-up
- More efficient and effective decision making
- Enhanced collaboration through shared information from an integrated database
- Focused cultural transformation to healthcare quality, safety and accountability

Personalized

Send a consistent message of safety across your entire system.

Six homepage content areas are populated with your organization's specific information such as pamphlets, alerts and new practices to reinforce a culture of safety.

Customized & Streamlined Data Collection

Improve efficiency, productivity and accuracy of information.

Fast, simple data entry for quality, incident, patient complaint, ADE and other event types is done through flexible and intuitive electronic templates.

Real-Time Notification

Accelerate communication and drive action.

User-defined rules enable all appropriate parties to be notified of a patient safety event immediately and simultaneously.

Workflow & Accountability

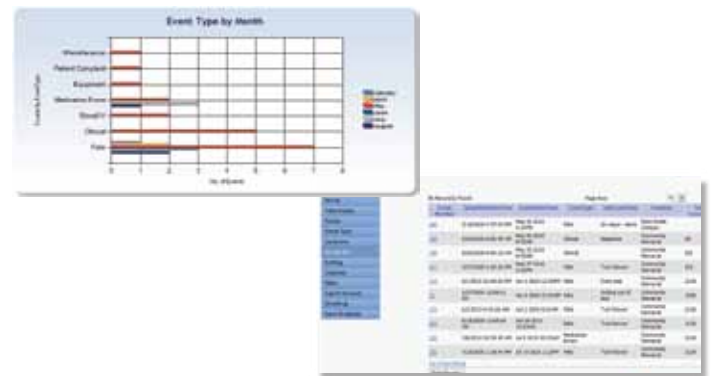

Monitor review grids and reminder emails to enhance investigation and action.

Workflow and accountability for action can be managed at the individual, unit, service and system levels.

Flexible Analysis & Graphing

Create template, ad hoc and customized reports.

A variety of reports are designed to meet the needs of authorized individuals. Plus, data is easily exported into upstream or downstream applications, including Microsoft Excel™, for additional integration, broader statistical analysis and external reporting.

Library & Knowledge Management

Just-in-time learning from the moment a report is submitted.

A searchable library of information linked to specific types of events or situations enables staff to immediately access policies, procedures and additional resources needed to support their care delivery decisions and follow-up steps.

Clarity Group, Inc. is a healthcare resource specializing in integrated risk/quality/safety systems and captive insurance company development and management. Building on more than 30 years of experience in healthcare risk and quality management, Clarity enables healthcare organizations to stabilize professional and general liability financial costs and execute on their vision for healthcare excellence as they transform their organizations into a Healthcare *SafetyZone* for their patients, residents, staff and visitors.
