

# HEALTHCARE SAFETYZONE®

## Flex-Fit™ Reporting

**PATIENT SAFETY, WHEREVER PATIENTS ARE™**

The Healthcare SafetyZone® Patient Safety & Risk Management Reporting System is built on Clarity's intelligent Flex-Fit™ platform, which empowers providers across the entire spectrum of healthcare to capture and learn from safety event data while addressing a wide range of organizational needs that are unique to their provider type.

**That means tailored reporting modules, smart workflows, and analytics built on a proven healthcare management framework to facilitate enterprise-wide learning and safer, more reliable healthcare delivery.**

### Your SafetyZone Journey

- > Proprietary onboarding process ensures that you get up and running quickly with minimal burden on staff
- > User-friendly system rapidly becomes familiar; begins to empower real change and make your life easier
- > Flexible framework quickly inspires you to move past traditional incident reporting and bring numerous other organizational reporting needs into the SafetyZone
- > Risk Management & Patient Safety experts at Clarity help you get the most out of your system

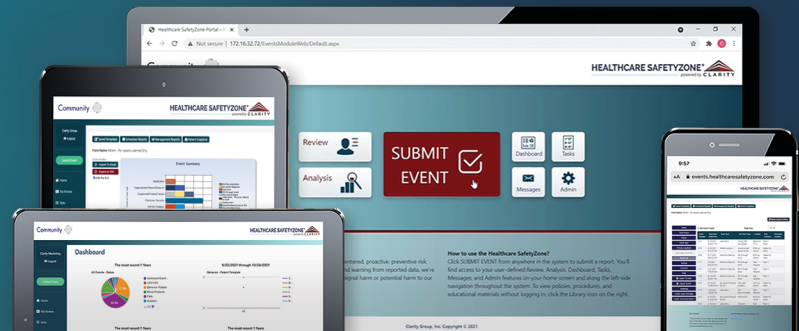

**Smarter, more efficient processes make your organization a SafetyZone for patients, visitors & staff... and that impacts your bottom line.**

### Patient-Centered, High-Reliability

- > Increased reporting volume; decreased reporting time
- > Greater accuracy and quality of information reported
- > User-defined workflows and dashboards for streamlined efficiency and teamwork around event follow-up
- > Powerful real-time analytics foster learning and drive decision-making

**Total enterprise-wide vision ensures that departmental needs are never siloed and keeps the patient at the center of care.**

### Flex-Fit™ Reporting by Provider Type

With access to numerous reporting templates informed by decades of client experiences touching every segment of healthcare delivery, SafetyZone users can mix and match between pre-built modules and nearly limitless customization options to meet a wide range of needs relevant to modern healthcare organizations.
