

INCIDENT REPORTING, TRACKING & DATA ANALYTICS

Our web-based application works across branches, camps, aquatics, childcare, youth and sports programs; helps meet YMCA insurance and safety reporting requirements; and has been designed in collaboration with YMCA safety and risk management teams.

EFFICIENT INCIDENT REPORTING

Report and track incidents and comments for participants, members, employees, guests, facilities, IT, and more with user-friendly templates. Submit reports in under 4 minutes with our intuitive interface that requires no technical expertise. Benefit from proactive risk management and reporting that includes safety events, behavioral events, drills, pool logs, building maintenance, transportation and more.

SECURE, SYSTEM-WIDE ACCESS & FOLLOW-UP

Compatible with any computer or smart device, our app eliminates user limits and license agreements, ensuring seamless access for everyone. Manage user access and benefit from SSO and password expiration compliance for secure data handling that meets regulatory requirements. Once a report is submitted, assign reviewers for follow-up and track progress, set deadlines, reminders, access logs, tasks and questions in a centralized message board.

DATA ANALYSIS

Easily access reported data for analysis, loss trends, customized reports for your YMCA, or for use with other internal processes such as claims and risk management. Identify trends, analyze data, and gain valuable insights, allowing for effective decision-making. Schedule automated regular reports or create adjustable templates. Export graphs and charts to Excel or PDF for further analysis or presentation.

LEADING CUSTOMER SERVICE

We're here for you from contract signing, to implementation and training, to ongoing support. With Clarity, you get the most out of your products and services. As an evergreen product, we don't do versions. Instead, we value client feedback and use it to inform enhancements which are implemented seamlessly as part of your relationship with us.

"The SafetyZone system is user-friendly and has been performing very well for us, not to mention the customer service has been outstanding."

Mike Evans, Facilities & Risk Manager
Channel Islands YMCA
