

# CLAIM MANAGEMENT SOFTWARE

Clarity's Claim Management Software is a web-based tool for the entry, maintenance and review of your organization's professional liability and other lines of coverage claims. It incorporates the best practices in claims management, complete with MMSEA reporting, and allows you to manage a claim through its entire life cycle, in one easy-to-use system.

## POWERFUL...AND EASY TO USE

Store all pertinent documents & files in one place so everything is there when you need it

Track all necessary financial information including reserves & payments

Easily locate previously entered claims through a variety of search criteria

Receive daily email reminders

Assess defense counsel's performance with built-in attorney evaluation tool

Review numerous template-based reports and/or customize your own

Track risk issues that are identified in your claims in order to monitor trends & initiate proactive risk management activities

**CLAIMS MANAGEMENT  
(INCLUDING BILL FORGIVENESS)  
AND MMSEA REPORTING  
IN ONE SIMPLE SYSTEM**

## COMPLETE *MMSEA* REPORTING

Easily transfer claims data to the COBC in an automated interface

Includes the 100+ MMSEA reporting requirements

Auto-populates over half of required MMSEA data fields

Assists registered reporting entities with the COBC online registration process

Assists clients with COBC data testing requirements

Creates a system to check for beneficiary status prior to reporting

## TECHNICALLY, IT'S SIMPLE

Accessible via your Intranet

Integrates seamlessly with Clarity's Healthcare SafetyZone® event reporting & management system, and other reporting systems as well

Web-based; no on-site IT maintenance

Professional training & help desk support

HIPAA compliant

Smooth implementation process
